

Gustaw H. J. Jakobsen

SOFTWARE ENGINEERING STUDENT

About me

Hello, my name is Gustaw, and I am a 23-year-old man from Frederiksberg. After I finished high school, where I studied Computer Science, I took a gap year where I chose to bartend at one of Copenhagen's largest and busiest nightclubs, Proud Mary.

After a little over a year, I decided to start studying Software Engineering at Aalborg University in Copenhagen (AAU), because of my passion for problem solving. Now that I have finished my bachelor's degree, I have chosen to further develop myself and my skillset by pursuing a master's degree in software. I am therefore looking for a job relevant to my studies, which I can manage while studying, where I can learn a lot and develop and improve not only my skills but also myself professionally.

Less formally, in my free time when school does not consume all my time, I enjoy playing video games, watching movies, and hanging out with my friends. I also enjoy spending time coding and developing on my hobby-projects.

I am now looking for a software development role where I can learn and play a significant role in something bigger.

Education

2009 - 2018	Skolen på Duevej Primary school, 1 st -9 th grade
2018 - 2021	NEXT KØBENHAVN - Vibenshus Gymnasium Computer Science Math A & Programming B Main courses: Math on A-levels, Programming on B-levels, and English on A-levels.

Language proficiency

I speak and write **Danish** at a native level.

I speak and write **English** at a highly advanced level.

Final comment

As a person I excel in environments that challenge me to learn and grow. My experience working in team-oriented roles has honed my collaborative skills and abilities, while my eagerness to gain adapt and learn modern technologies, procedures, and systems, has proven to me and previous employers that I work well in a fast-paced environment

Picture and application should be attached.
